

How to connect a laptop to the projector.

1. Turn on the projector using the power button located on the projector itself or the remote control.
2. If the projector does not turn on, locate the wall switch (it will be labeled), flip the switch and then try again.

3. Plug in and turn on the laptop.
4. Log into the laptop.

Plug in the HDMI or VGA cable in connecting the laptop to the Trulink

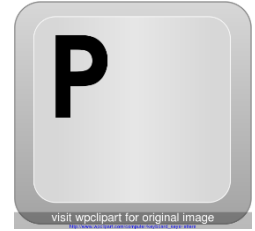

VGA

HDMI

5. If the projector does not recognize the laptop automatically, hold down the Windows key and press P.

6. Keep pressing "P" until Duplicate is selected.
